Subject: ANOVA and ANCOVA results
hydroponic_anova_20140219.docx

Ed, Phil, and Russ,

Attached are the ANOVA and ANCOVA analyses of the hydroponic data. Russ, again, was very helpful in setting up these tests. I also ran this approach past David Staples, a statistician with the DNR, and received his blessing of support. Let me know if you need anything clarified, revised, expanded upon. I hope this helps with the initial reporting you need for now. Russ made several good suggestions to me for how to best present these data (e.g. % weight gain instead of weight change), but maybe that can come later and get incorporated into the more formal “technical report”?
